2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Claim 3: binder type either water soluble or water dispersible polymer
- Claims 4-5: a specific polymer.
- Claim 6: a solvent soluble or solvent dispersible polymer binder
- Claim 7; a re-dispersible particulate
- Claim 11; a solvent
- Claim 12-14: select a thin film material
- Claims 18-32; a single method of depositing the thin film.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1-2 are generic.

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Claims 44-45: a first solvent.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 42-43 are generic.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Claims 51 and 52-54: method of stripping.

Art Unit: 1762

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 50-51 are generic.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Claims 59 & 60 : a printable material.
- Claims 63 and 64-66: method of stripping

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 58 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added . An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1762

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
